OBJECTIVE

Computer Science undergraduate specializing in Java, Python, SQL, and Machine Learning. Experienced in building ML models, NLP systems, and Java-based applications. Seeking the Software Engineer / Data Analyst role to apply problem-solving, OOP, and data-driven development skills.

EDUCATION

Kalasalingam Academy of Research and Education Sep 2022 – May 2026
B.Tech in Computer Science and Engineering
CGPA: 8.00

Sasi educational Institution Jul 2020 – May 2022
Intermediate | 87.5%

Bhashyam Jun 2019 – Apr 2020
SSC | 85.0%

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Core Concepts: Object-Oriented Programming (OOP), Data Structures, Algorithms, DBMS

Data & ML Tools: Pandas, NumPy, Matplotlib, OpenCV, TensorFlow, MATLAB

Software & Tools: Git, GitHub

Core Concepts: Machine Learning, Data Analysis

PROJECTS

Genotype-to-Personality: An Explainable Machine Learning Framework Using Simulated SNP Data

- Built a Random Forest model to predict personality traits from SNP-based genetic data using the Big Five framework.
- Applied SHAP (Explainable AI) to interpret predictions and highlight key genetic feature contributions.
- Developed a Streamlit web app for real-time personality prediction and interactive data visualization.
- Designed an end-to-end pipeline including data simulation, preprocessing, and model optimization.

Study Group Finder & Collaboration Platform

- Developed a full-stack Study Group Finder platform using React, Spring Boot, and MySQL.
- Implemented secure authentication using JWT and Spring Security.
- Built features for user profiles, course management, and peer discovery.
- Integrated image upload and email notification services to enhance user experience

PUBLICATIONS & PRESENTATIONS

- “Genotype-to-Personality: An Explainable Machine Learning Framework Using Simulated SNP Data ” – Paper Presentation, IEEE 3rd Global Conference on Wireless Computing and Networking (GCWCN) IEEE Xplore digital library effective 2026-3-26 [-View Paper](#)
